

Fund Administration Solutions For Spend Managers

Global Top 20 hedge funds have deployed our latest application designed to streamline internal mid and back office functions, while ensuring a complete audit trail is maintained. It provides enhanced functionality that removes the need for spreadsheets, paper, PDF and other human/manual processes within compliance, legal, finance, fund accounting and administration.

We touch on the following stakeholders:

Legal

Administration

Compliance / Regulatory

Finance

Fund Accounting

Resolvr - "Connecting Digital Islands" within your organization.

Resolvr is a high performance application, under a new brand:

Resolvr is being integrated into other business critical applications used by fund administrators, including fund accounting and finance tools such as QuickBooks and Hazeltree.

In the first release of Resolvr we are facilitating the seamless, auditable workflows of digital expense management, review, apportionment and allocation according to the fund or funds to which every dollar should be associated. There are accounts reconciliation, oversight and control mechanisms built in to ensure all stakeholders can share information, make adjustments, send annotations, attachments and other communications before the final product is handed over to finance. All transactions contain an appropriate audit trail. API feeds to and from Resolvr remove the need for spreadsheets or paper to connect each requisite department. Time and resource consuming manual tasks become redundant.

This fully digitized environment not only saves time, money and effort, but also cuts down on human error in data handling, thus improving levels of compliance.

We are building out enhancements and modules, including the "Compliance Dashboard", for the CCO and General Counsel, plus adding further data visualizations to our analytics reporting platform.

aXpire SMT has utility within hedge funds, private equity firms and fund administrators, all aiming to reduce the burden and risk of the current human/manual processes for all spend managers.
