

Empowering finance managers and administrators

attain cost efficiencies by implementing our technology solutions in the mid and back office.

aXpire has launched its latest technology innovation into the Fund Administration Services space.

aXpire will initially serve to help spend and fund administrators and managers at banks, hedge funds, private equity firms and others to deal with the resource and time-costly process of allocating and apportioning outside vendor costs to each fund, or split of funds as is appropriate, based on the deal.

Our suite of aXpire applications will expand to create seamless, digital connections across all key functional departments and stakeholders, including:

 Legal

 Administration

 Compliance / Regulatory

 Finance

 Fund Accounting

Key Benefits of aXpire

- Removal of Human-Manual Processes
- Replace PDF and Excel with Digital Workflows
- Ensure Minimal Touch Points in the Process
- Reduce Cost of Operational Management
- Enable Electronic Inter-Departmental Communications
- Track and Manage Workloads, Timelines, Aging
- Connect Disparate “legacy” Technologies
- Provide Digital Audit Trails
- Reduce or remove Data Quality Errors
- Enhance Compliance Reporting Capabilities
- Provide Robust Data Analytics Dashboards
- Delivered via a highly secure SaaS Model

The solution is focused on utilizing technology as a primary platform to reduce human error and enhance internal procedures via a “connected application”.

As aXpire evolves, further technological enhancements will be implemented as well as value-add services that include Legal, Actuarial, Accounting and General Administration.

aXpire is deployed as a highly secure SaaS model, meaning that we offer extremely competitive pricing when compared to more traditional fund administration service providers.
